There is a growing concern that the use of the term "terrorism" is being abused by the media and the public. The term is being used to describe a wide range of activities, from the bombing of a train to the assassination of a politician. This is a dangerous trend, as it can lead to a loss of focus on the real threats to public safety. The term "terrorism" should be reserved for the most serious and heinous acts, and should not be used as a catch-all term for any act of violence.

New US sex ed standards released

WASHINGTON, Sept. 3 (AP) — The U.S. Department of Education has released new national standards for sex education, which will be used by states to develop their own curricula. The standards, which are the first since 1975, cover topics such as abstinence, contraception, and sexually transmitted diseases. They are intended to provide a framework for states to develop their own sex education programs, which are required in all 50 states and the District of Columbia. The standards are divided into three levels: elementary, middle, and high school. The elementary level focuses on basic concepts of human development and relationships. The middle level covers more complex topics such as decision-making and self-respect. The high school level addresses more advanced topics such as reproductive health and the legal aspects of sex. The standards are available on the Department of Education's website at www.ed.gov.

Strike over rising fuel prices paralyzes oil-rich Nigeria

LAGOS, Sept. 3 (AP) — A nationwide strike by oil workers in Nigeria has paralyzed the country's economy, as fuel prices soared and government services came to a standstill. The strike, which began on Sunday, was led by the Nigerian Union of Petroleum Workers (NUPW), which demands higher wages and better working conditions. The union's actions have caused a severe shortage of fuel, which is essential for the country's economy. Many businesses and government offices have closed, and public transport has been disrupted. The government has urged the union to return to work, but the strike has continued. The situation in Nigeria is expected to worsen as the strike continues, with many people facing difficulties in accessing basic services.

WORLDWIDE

Most of the world's oil is produced in the Middle East.

The Middle East is the world's largest oil-producing region, accounting for about 30 percent of global oil production. The region includes countries such as Saudi Arabia, Iraq, Iran, Kuwait, and the United Arab Emirates. These countries have large oil reserves and produce a significant amount of the world's oil. The Middle East's oil production is crucial for the global economy, as many countries rely on oil for their energy needs. The region's oil production has been a source of tension and conflict, particularly in the Middle East, where there are many disputes over oil rights and control.

APOLOGY TO THE PILIPINAS ANTI-PIRACY TEAM

am Paul Abilaga, computer technician of Premium Logo Computers located at Trisoma Mar, Quezon City.

In order to make extra income, I bought computers with high-end software to maximize the capacity of my computer. As a result, I got caught that installing unauthorized and pirated software program on computers for sale to customers is against the law, but I did not think it was that bad.

On 9 December 2011, I illegally installed counterfeited software programs on a computer which I gave for sale to a friend of Premium Logo Computers. On the same date, members of the Pilipinas Anti-Piracy Team visited our store and they found that I personally installed unlicensed software programs for customers. We were immediately arrested in a buy-bust operation conducted by the Pilipinas Anti-Piracy Team.

I hereby apologize to the copyright owners concerned for violating their intellectual property rights. They have agreed to give me a chance to learn from my mistake and have agreed to do my part to help educate others who might be tempted to do what I did.

I strongly advise others not to commit IP crimes. I can tell you from my own experience that you could lose everything - your job, your reputation, your whole future. It's just not worth the risk.
